Mission statement

"Because we felt enterprises needs a dedicated, secure, fast and one single solution for all their workplace migration needs "

Alicetrix

WHAT WE OFFER

We offer single one stop solution and a simplified license pricing model for your entire workplace migration needs. Any customer with desperate workplace environment can look to centralize their workplace contents in one single platform using our software.

Alicetrix Enterprise Workplace Migrator supports Cloud based Tenant to Tenant migration helping migrate Emails, Calendars, Files, Messages from Exchange Online, OneDrive, SharePoint, Google and multiple platforms.

Our key differentiator is that your data is moved through your secured and own Azure tenant during migration. Additionally, security is enforced by using your security/App ID, which is not shared with anyone outside of your organization, hence offering security intrusion protection. This ensures full compliance to your requirements such as GDPR, HIPAA, PHI etc. On top of that, you can utilize the full internet bandwidth of your server for migration, and a prioritized multi-threaded server environments ensures a faster migration with speeds reaching up-to 6 GB per hour for single instance*.

The software also offers comprehensive reports and dashboard for pre- and post-migration and during the migration process.

Why Alicetrix AxW?

Save your company money

Alicetrix Enterprise Workplace migrator is priced on a pay-as-you-go mode for customer not capped by either number of Users or amount of data to be migrated. This ensure our customers get maximum flexibility, budget saving. You only pay when you do the migration or VMs can be removed easily from your infrastructure

Migrate quickly and flexibly

Alicetrix Enterprise Workplace Migrator has process and tools for enabling a successful migration. It offers pre and post migration reports that can help users plan the migration appropriately as well as validate, once migration has been completed. It also provides intuitive dashboard capability during migration, that can be accessed through any device.

Rich Features

Alicetrix Enterprise Workplace migrator allows for rich migration capability ensuring zero data is left behind. Complex migration approach example Cutover or Staged Migration can be implemented. Additionally, it also allows for Calendar and Permission migrations. Software is built to do migration for multiple days with auto-failover and multi-thread algorithm.

Secured data migration

Get peace of mind knowing your software is running in your infrastructure and is not leaving your network boundary. Confirm to your InfoSec/Security requirements by ensuring that you are not sharing your app information or giving access to any third party apps in your environment for migration purpose.

Multiple Case Studies and Use cases

Alicetrix is helping our customer migrate in multiple scenarios, i.e. from one cloud platform to another, acquisition, divestment and other complex scenarios thereby generating huge end user satisfaction.

Key use cases
